This edition of the Iraq Oil and Gas Technology Exhibition OIGATECH 2026 will be held 16-13 december 2026 at the Baghdad International Fairgrounds and Exhibition Centre in Baghdad, Iraq, with Iraqi Ministry of Oil serving as the Exclusive Host.

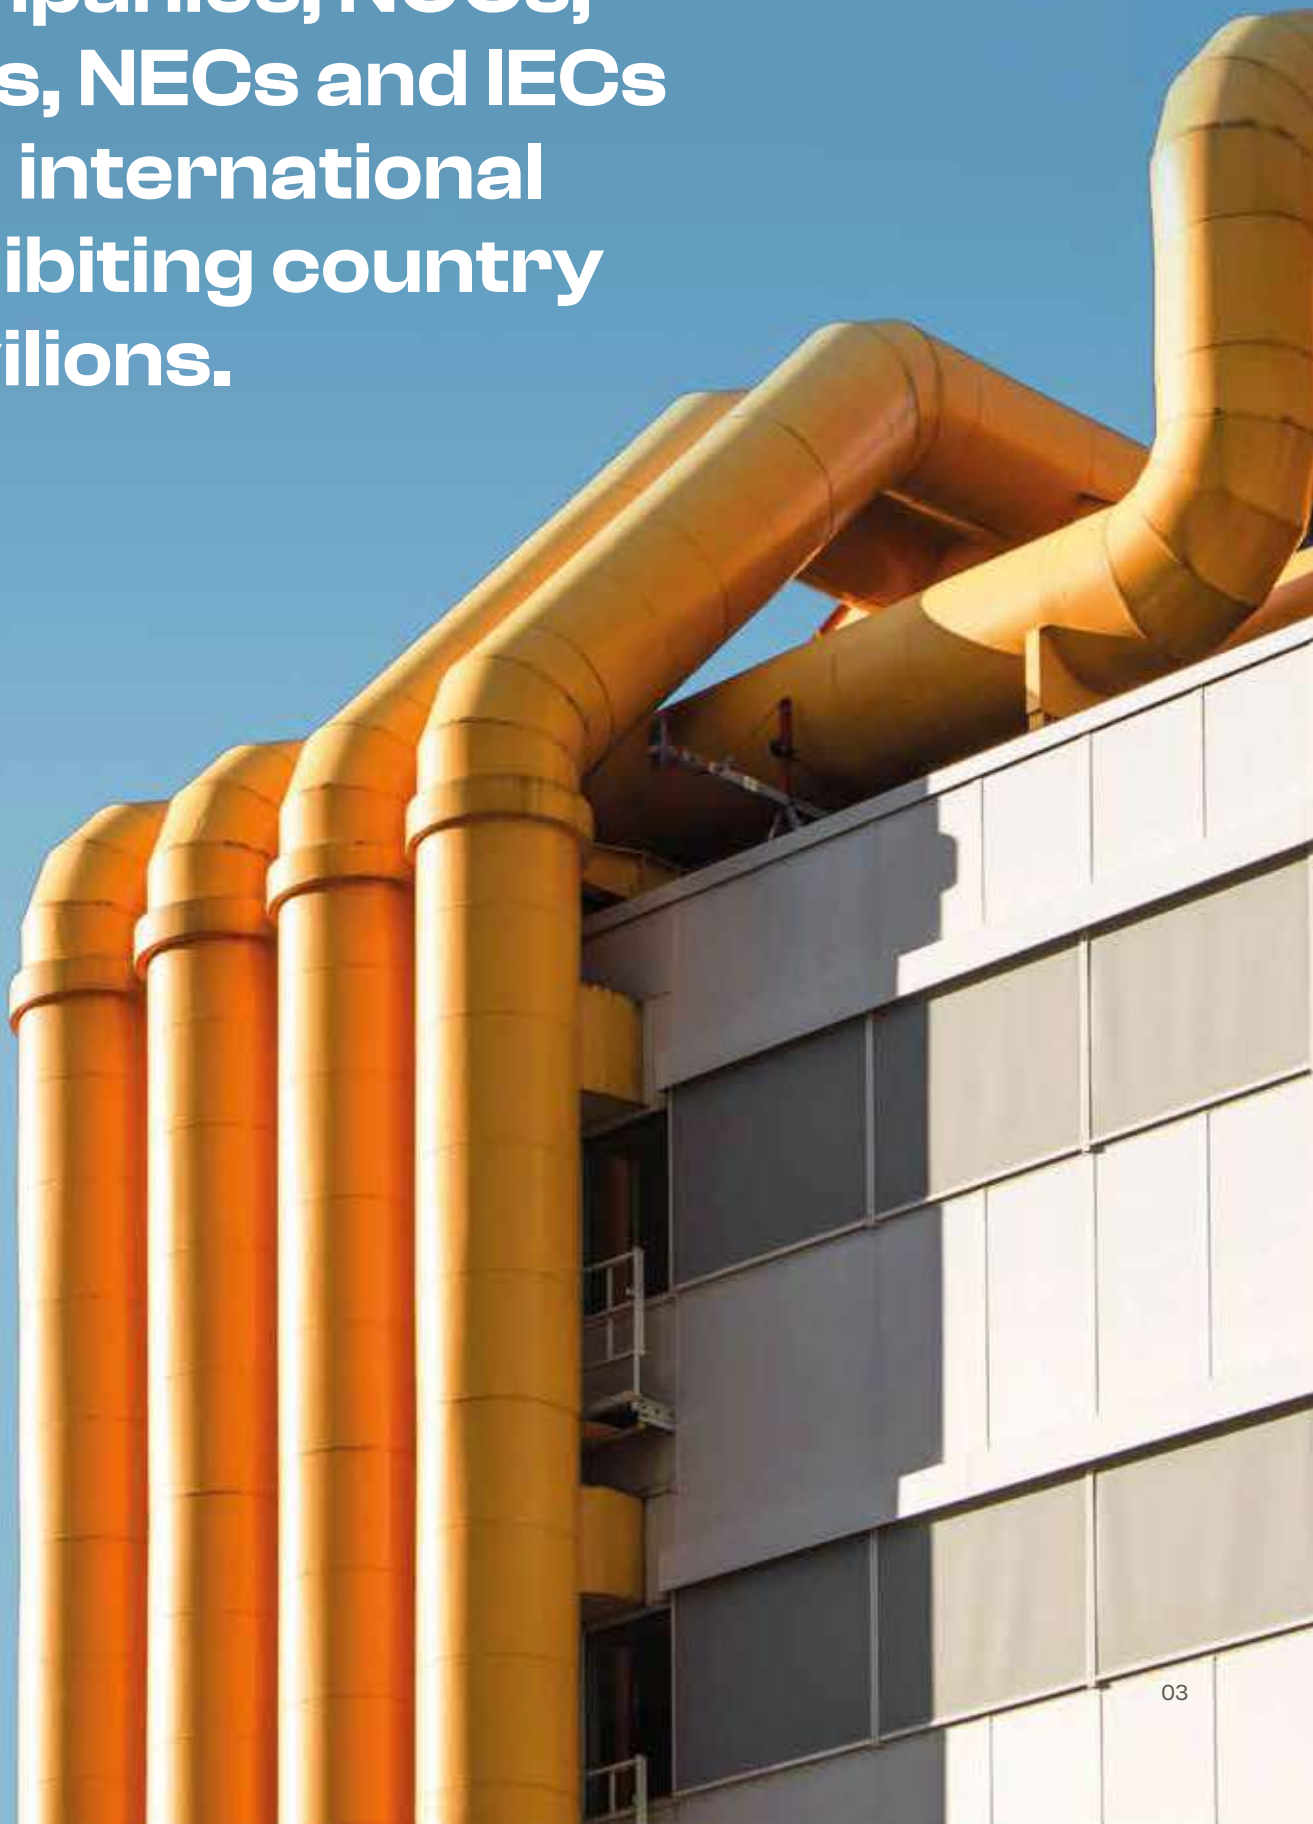

Under the patronage of the Prime Minister Mr. Ali Falih Al-Zaidi

Fig 01.1 Oil Field – Iraq

OIGATECH 2026 is focused on the dissemination of new and current technology, best practices and multi-disciplinary activities designed to emphasize the importance of the value chain and maximizing asset value. The knowledge, capabilities and strengths of the participating countries and the sponsoring societies global membership, over the spectrum of multi-disciplinary technologies, are central to the success of the exhibition, Technologies are evolving at an unprecedented pace and present a significant advantage to energy companies that integrate them into their operations to drive business transformation, accelerate decision making and address decarbonization of operations,

The world's energy ecosystem – exhibiting companies, NOCs, IOCs, NECs and IECs and international exhibiting country pavilions.

Join Leading NOCs, IOCs & IECs From Around The World In Baghdad

OIGATECH 2026 exhibition provides a unique platform for interaction between leading NOCs, IOCs and IECs. Leading energy companies from around the world convene and bring industry leading technologies and solutions to the largest oil, gas, and energy event.

OIGATECH 2026 Exhibition will be a global showcase of the latest technological innovations that will enable the energy industry to focus aggressively on both capital and operational efficiency, delivering real value for the investment, as technologies becomes more deeply integrated at each stage of production.

Why⁰³ — exhibit

OIGATECH 2026 will occupy a special place in the marketing and communications strategy for IRAQ Oil and Gas market of any company. There is no other means of communication which can be approached so individually and nowhere else it is possible to provide face to face negotiation with customers, bringing into play all the five senses to make them aware of their need for information or, in some cases, to satisfy an existing need for such information.

OIGATECH 2026 is a place for bringing all its branches together and offered opportunities are almost limitless. In any successful business getting in touch with customers is a key strategic factor in both international and local markets. Another advantage of taking part in OIGATECH 2026 is that it affords an opportunity to maintain contacts with existing clients. Research of the exhibitions prove that "exhibiting goods at a trade fair influence purchasing decisions six times more than any other method and people remember exhibitions longer than adverts". Statistics prove that %57 of buyers purchase goods and services at exhibitions and %90 of visitors use the information they obtain at exhibitions when making decisions about buying certain goods or services.

Among the advantages of taking part in an exhibition is that a company attracts attention to its goods - and not just the attention of the specific group of people visiting the exhibition, but also of the media and of the state structures. It also offers them quantitatively and qualitatively excellent contacts with the targeted group at a relatively low cost.

OIGATECH 2026 afford the most direct form of sales: face to face with potential clients and suppliers. The cost of conducting business through exhibitions is almost half of that %45 of using more traditional direct sales methods. Given the estimated cost of one visitor, the costs of exhibiting are considerably lower than those of any other form of advertising.

Advantages

OIGATECH 2026 offer participants many advantages, including:

- A. The cost of contact with one representative of a company's target audience at an exhibition or trade fair is markedly cheaper than any other means of advertising.
- B. The unique "extra-territorial" nature of an exhibition makes it much easier to establish contacts; in this environment you, your potential customers and your competitors are all on neutral territory.
- C. An exhibition is the ideal place to learn about demand for new goods and to conduct research into what your competitors are doing.
- D. An exhibition is an effective means of helping a firm to penetrate new foreign markets or establish dealership networks.
- E. An exhibition allows you to show your new goods in action.
- F. The fact that media representatives attend exhibitions makes it a lot easier to work with them and helps with the creation of PR material.
- G. Taking part in an OIGATECH 2026 allows you access to a substantial segment of the market in a short period of time.
- H. For any business an OIGATECH 2026 is a bridge linking customers, wholesale and retail trading companies, suppliers and manufacturers and it offers a competitive environment for making new contacts.
- I. The very best intellectual and material resources available for you to take advantage of are concentrated in and around an exhibition for the short period of its duration.

Main⁰⁴ — Sectors

Oil & Gas Upstream and Downstream Companies

1. Oil & Gas Producers
2. Oil & Gas Refineries
3. Oil & Gas Exploration Companies
4. Oil & Gas Contractors
5. Oil & Gas Drilling Companies
6. Power And Energy Companies

Oil & Gas Supporting Industries

1. Airlift, Helidecks and Logistics
2. Bulk and Materials Handling Systems
3. Cables, Umbilical's, and Accessories
4. Chemicals, Fluids and Lubricants
5. Communications
6. Computer Hardware and Software and IT Solutions
7. Controls, Consoles and Panels
8. Corrosion, Cathodic Protection, Coatings and Insulation
9. Dredging, Piling and Trenching
10. Drilling and Well Completion Equipment
11. Emergency Control and Shutdown Systems
12. Environmental and Oil Spill Response Equipment
13. Fabrication, Manufacturing and Repair Yards
14. Fire Protection Systems and Materials

15. Flare Systems and Equipment
16. FPSO Vessels and Equipment
17. Hydraulics and Electromechanical Equipment
18. Hydrographic, Meteorological, Seismic, DP and Survey
19. Inspection, Maintenance and Repair Instrumentation
20. Lifting Equipment, Cranes and Winches
21. Lighting
22. Linings, Seals and Gaskets
23. LNG Terminals
24. Laboratories
25. Mooring, Chains, Ropes and Anchors
26. Pipeline Inspection and Maintenance
27. Pipelines and Piping Components
28. Power Generation and Propulsion Machinery
29. Processing, Separation, Filtration and Water Treatment
30. Professional Services, Training and Classification
31. Project Management, Consultancy, R&D
32. Pumps and Compressors
33. Reservoir and Production Monitoring
34. Rock Dumping
35. ROVs, Diving and Cameras
36. Steel, Special Metals, Composites and Welding Alloys
37. Subsea Production and Well Equipment
38. Survival, Safety and Protection
39. Security Solutions
40. Valves and Actuators
41. Vehicles
42. Well Servicing Equipment

Offshore Supporting Industries

1. Ship Repair & Conversion
2. FSO / FPSO Vessel & Equipment
3. Offshore LPG / LNG
4. Support & Supply Vessels
5. Semi Submersibles
6. Drilling Vessel
7. Heavy Lift Vessel
8. Subsea Design & Technology Providers
9. Ship, Boats, Vessel Equipment & Services
10. Instruments & Control
11. Drilling & Well Control
12. Tubular & Piping
13. Design & Construction
14. Monitoring & Instrumentation
15. Data Acquisition, Storage and Transmission
16. Contracting Services
17. Flow Control
18. Umbilical & Hose
19. Pump Equipment and Services
20. Deck & Hydraulic Equipment
21. Cabling
22. Transport & Storage
23. Process Equipment & Services

About — United

The United Company for Fairs and Conferences is an Iraqi company registered at the Ministry of Trade and a private company with limited responsibilities located in Baghdad.

The company's goal is to activate the Iraqi economy by holding fairs and conferences, The company is specialized in holding the Iraq Defense Exhibition since 2012 until now and Cybersecurity Show ATSO SHOW since 2021.

the company's staff is working hard to make this fair like the well-known international fairs through the preparations, organization, and the participation level of the foreign and specialized companies to support the developing process in Iraq.

About ⁰⁷ — OIGATECH Conference

OIGATECH Conference promotes collaboration, innovation, investment, development, partnerships, sustainability, technology, networking, opportunities, and leadership in the energy .sector

The OIGATECH conference is a leading platform in Iraq for the oil and gas industry, fostering direct interaction between experts, companies, and government agencies, opening up broad horizons for cooperation and partnerships in this vital sector. The conference highlights the latest developments in oil refinery systems and carbon capture and storage technologies, in line with global trends to reduce emissions. The conference also discusses smart fleet tracking solutions, focusing on the role of the Internet of Things and analytics in improving logistical and operational efficiency. In addition, the conference provides a distinguished platform for presenting specialized research papers, including studies related to natural gas investment, providing valuable academic insights that support Iraq's sustainable development path and strengthen its position as a regional hub for energy technology and investment.

About —⁰⁶

Maral International Trading Company

As an experienced event organizer with a capable team, MIT Co. has extensive expertise in delivering large and small scale events in the region, spanning various industries. Our event organizers have delivered some exceptionally high profile corporate and consumer events. We are passionate about enabling events to reach their full potential, whilst meeting targets and budgets, through professional project management.

Maral International Trading Company is a full services event management company and international trading.

About ⁰⁸ — TECHLAND

The Strategic Sponsor

TechnoLand LTD, founded in 2012 in Baghdad, delivers advanced technology solutions for Iraq's oil and gas industry. We provide specialized equipment for exploration, drilling, refining, and pipeline operations, along with monitoring, control, and automation systems.

Through R&D and partnerships with global leaders, we offer solutions that improve efficiency, safety, and reliability in challenging environments—from deserts to offshore sites. Our AI-powered tools enable predictive analytics, automated monitoring, and operational optimization to meet evolving industry demands.
